TR 34 IV Edition : Permissible 95 percentile values on Properties E and F.

Floor Class	Typical Floor Use	Property	
		E	F
FM1	Where very high standards of flatness and levelness are required	4.5	1.8
FM2	Reach tracks operating at 8-13m without side shift	6.5	2.0
FM3	Retail floors to take directly applied flooring. Reach trucks operating at upto 8 m without side-shift	8.0	2.2
FM4	Retail floors to take applied screeds. Workshops and manufacturing facilities where MHE lift heights are restricted to 4m	10.0	2.4

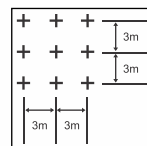

Note Side shift is the ability of a truck to adjust the pallet transversely to the fork direction

### We meet FM standards

- Ability to construct floors confirming to TR. 34, DIN Numbers, F-Numbers system

#### Property E

To Control levelness, the elevational difference in millimeters directly between fixed points 3m apart (not across the diagonals).

#### Property F

To Control flatness, the change in elevational difference between two consecutive measurements of elevational difference each measured over 300 mm.

Level but not flat

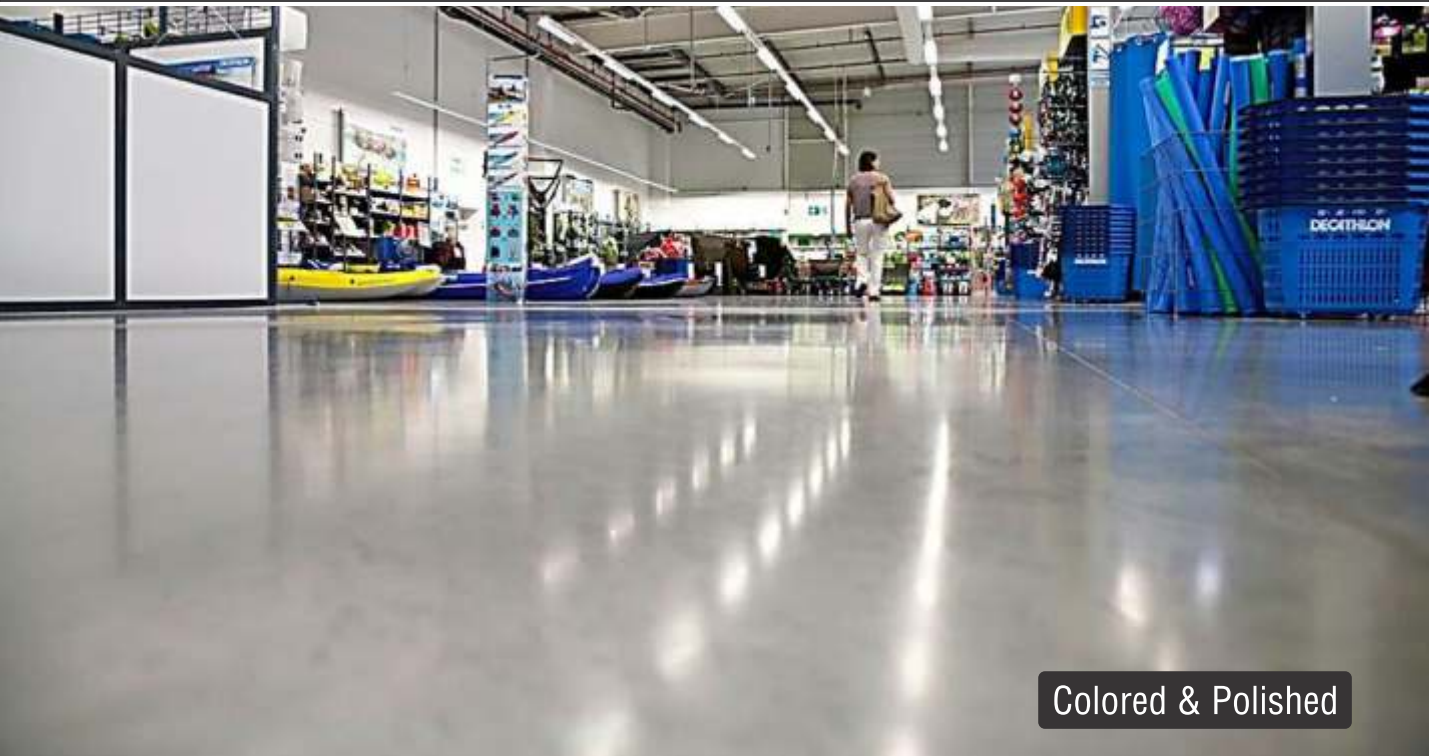

Flat but not level
